What Real Users Are Saying About Automation Anywhere Versus UiPath

Developer
at a manufacturing company
with 10,001+ employees
★★★★★

"I have experience working with UiPath as well. The one thing is the customer involvement and experience is much better with Automation Anywhere. The feedback which we give and the response time from the Automation team is much quicker."

Gagnish R.
ETL Analyst at a tech vendor
with 10,001+ employees
★★★★★

"I've used UiPath as a developer. Now, I'm using Automation Anywhere as well. When I compare both, the biggest point is cognitive abilities. The IQ Bot is the best in class. You won't find that even in UiPath."

RPA Developer
at a financial services firm
with 10,001+ employees
★★★★½

"Automation Anywhere can easily be adopted and learnt. UiPath requires some programming skills and knowledge. Compared to UiPath, Automation Anywhere is easy to learn with its drag and drop commands. In UiPath, the commands were difficult to work with and also architecture."
